# Recycling

- ▶ Process of converting waste materials into new materials and objects.

# Benefits of recycling

- Reduces the amount of waste sent to landfills and incinerators
- Saves resources and energy
- Reduces global warming
- Free disposal of unnecessary household waste

# Why recycling?

<https://www.youtube.com/watch?v=4G874Q0M1Zs>

# Useful tips

- Separate your trash
- Use reusable bags instead of plastic ones
- Buy rechargeable batteries rather than disposable ones, and then recycle them using the recycling banks
- Take packed lunch to work or school in a reusable plastic container
