DATE: 7th March 2018

Time: 135 minutes

Subjects involved: science, physics and chemistry, geography, English, Portuguese, PE

MATERIALS AND TOOLS:

- map
- compass
- question cards
- answer cards
- pen
- road book

LEARNING AIMS:

- To recognise and use vocabular belonging to the topic
- To learn about eco-friendly activities
- To acknowledge the importance of protecting the environment
- To acquire knowledge related to the topic
- Assess knowledge of some of the topics taught in previous classes
- Interact in groups
- Enlarge their vocabular
- Develop skills related to orienteering

ASSESSMENT:

- direct observation
- behaviour
- level of concentration and participation

PROCEDURE:

Teachers prepared the activity in advance.

Teachers and students go to Arbutus do Demo.

1st step:

Teachers wrote questions on issues related to environmental education: pollution, recycling, renewable energies, the importance of clean/fresh water...

Teacher wrote the answers to the questions.

2nd step: Students are divided in groups. They are given a card.

3rd step: Students are searching for the questions and the answers and write them down on a card.

4th step: the group with more correct answers wins.
